Hard working college student currently enrolled in Artificial Intelligence – Software Engineering Technology program at Centennial College, seeking opportunity to gain experience as a software developer specializing in Artificial Intelligence. Keen to contribute by applying coding skills in **Java, C#, Python** and **SQL**. Skilled at debugging and troubleshooting technical issues. Dedicated and hardworking team player with experience collaborating on projects to design databases, build responsive web applications, and develop backend systems. Committed to solving problems and delivering successful outcomes.

TECHNICAL SKILLS:

- **Programming Languages:** Proficient in C#, Python, and JavaScript for backend and application development.
- **Web Development:** Experienced with HTML and CSS for building responsive and accessible web interfaces.
- **Operating Systems:** Strong knowledge of Unix/Linux environments, including scripting, file management, and permissions.
- **Backend Development:** Understanding of APIs, server-side logic, and database integration.
- **Productivity Software:** Certified in Microsoft Word and Excel, skilled in documentation and data organization.

EDUCATION:

Artificial Intelligence – Software Engineering Technology (Co-op)			September 2024 – Present
Centennial College, Toronto, ON			
• Courses:			
Advanced Database Concepts	Introduction to Ai	Java Programming	
AI Systems Design	Linear Algebra & Statistics	Web Application Development	
• Courses Completed			
Programming 2	Client-Side Web Development	Introduction to Database Concepts	
Discrete Mathematics	Unix/Linux Operating Systems	Software Requirements Engineering	
Business Diploma			April 2024
Centennial College, Toronto ON			

PROJECTS:

Car Dealership Website

- Developed a responsive multi-page website for a fictional car dealership using HTML, CSS, and JavaScript, featuring dynamic car listings and a contact form.

BMI Calculator Web Application

- Built an interactive BMI calculator using JavaScript, HTML, and CSS with real-time input validation and feedback.
